Chapter 1. Introduction

in fucking progress…

Read [project reference documentation](#)

to build and bootstrap all services, udse command:

```
./gradlew :composeDown; ./gradlew clean ass :composeUp
```

gradle

```
docker-compose down -v --rmi local; ./gradlew
echo '["ololo","trololo"]' | http post :8081/app/orde
docker-compose up -V --always-recreate-deps
```

maven

```
docker-compose -f docker-compose-maven.yaml down -v --rmi local ;./mvnw
docker-compose -f docker-compose-maven.yaml up -V --always-recreate-deps
echo '["ololo","trololo"]' | http post :8081/app/order
```

to run kafka only by using docker-compose, run:

```
docker-compose run kafka
```

build (no!)

```
./mvnw clean package docker-compose:up -P docker
./mvnw docker-compose:down -P docker

./gradlew clean build :composeUp
./gradlew :composeDown
```

Initially generated by using [generator-jvm](#) yeoman generator (java-parent-multi-project)
